POLITÉCNICA

Demonstration of multi-tree harvesting technology and boom-corridor thinning technique in oak-coppice

Where? [Villar de Ciervos](#), León (Spain)

When? **20th September**, from 11:30-14:30

Who? Universidad Politécnica de Madrid is the host of this event

Dear expert, we invite you to a workshop and hands-on demonstration aimed at promoting machine thinning in the younger forest stands and demonstration of a special collecting harvesting head -Bracke (C16.c). In the field, a boom-corridor thinning technique will be presented, which is faster than the selective thinning and at the same time gives comparable results.

For easier organization, participants are kindly requested to confirm their attendance by electronically at the link: [registration form](#).
